Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response to applicant's filing dated December 23, 2005. The following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2254677.

The examiner is relaying an oral English translation of the Japanese document. A full English translation was requested and would be provided upon request by applicant. The claims are rejected by relaying on the English abstract. The claims are drawn to an alternative limitation "or" where in only one of the limitation is needed to be shown in the reference to meet the claimed invention. The reference discloses a data format recording operation on a medium, wherein a format command is received to be written on the medium characterized in that if an error occurs during the data writing (empty data blocks) then the reference discloses two options: either to ignoring it or not meeting the broad claims.

With respect to the limitations of claims 2 and 9. The reference discloses that the error is ignored then proceeds to other operations by not reporting the error.

Claims 3-7 and 10-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art shows or teaches an optical disk having an inner lead in area, user data area and a lead out area wherein based on a format or session command recording, the recording errors are ignored in the unused reserved areas of the disk that is located in the lead-in or leadout areas.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 7102988 and 7072256.
